

PROTECT YOUR HOME FROM A THREAT YOU CAN'T SEE.

Sentricon® AlwaysActive™ is the new and very different way of continuously protecting your home against termites; harnessing the natural behaviour and biology of termites, together with a highly effective termiticide.

Sentricon AlwaysActive offers the safety of a baiting system and the continuous protection of a physical barrier or liquid chemical treatment.

Sentricon AlwaysActive is a unique and environmentally sensitive termite management system that protects your home all day, every day from day one. Eliminating termites before they are even discovered.

 **SENTRICON**
ALWAYSACTIVE™

Termites are no match for the colony elimination power of the Sentricon® System. Science is the reason why Sentricon works.

60+ SCIENTIFIC STUDIES PROVE IT WORKS

You can be confident you made the right choice in termite protection because Sentricon uses **smart science** to eliminate existing colonies as well as protect your home from future colonies.

THE SCIENCE AND POWER OF SENTRICON ALWAYS ACTIVE

Sentricon stations are installed strategically and discreetly around your home, in prime foraging areas. They contain Sentricon IG Termiticide Rods which termites find more palatable and **more attractive than wood**. The termites feed on the termiticide and take this back to their nest, all the while unaware that it is detrimental to their survival.

Termites periodically shed their skin (moult), and this process is interrupted once ingestion of the Sentricon AlwaysActive occurs. An inability to moult results in the death of the workers, and ultimately leads to the **elimination of the entire colony**,

including the termite queen (who can produce over 1 million eggs over her life).

Using **scientific knowledge** of termite behavior, Sentricon eliminates the queen and her colony by ending the food chain needed for survival.

With the proven power to wipe out future house-hungry termite generations, Sentricon gives you **complete termite protection**.

As it is so specific, it is deadly to termites, but **safe to you, your family, pets and the environment**.

JUST BECAUSE YOU DON'T SEE THEM, DOESN'T MEAN THEY'RE NOT THERE.

TERMITE DAMAGE
IS RARELY COVERED BY HOMEOWNERS INSURANCE.

IF YOUR NEIGHBOR'S NEIGHBOR'S NEIGHBOR HAS TERMITES, YOU COULD, TOO.

REPAIRS CAN COST THOUSANDS OF DOLLARS.
